
Referral Network for Independent Professionals

Referna matches independent professionals (fractional execs, AI consultants, GEO specialists, and more) into referral circles where trusted peers refer clients to each other.

EXECUTIVE SUMMARY

BASICS

Problem	Independent professionals' #1 problem is getting the next client.
Solution	Referna matches them into circles of trusted peers who refer clients to each other.

EVIDENCE

Will they refer each other?	340K members of an offline network (BNI) pay \$800/yr to refer \$26.4B/yr — for 40 years.
Can we get users?	427 registered, 174 onboarded, 117 active last week — doubling every 2 weeks, eight weeks post-launch.

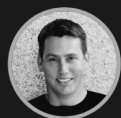

SIZE

Are there many customers?	130M independent professionals globally; 9.26M addressable in the US.
Will it have a moat?	Networks have great moats — and grow fast once seeded.

TIMING

Why now	AI is approaching the inflection point where it can facilitate the circles BNI needs 40,000 operators to run.
Why us?	We love networks — built 3 already. 2 exits. 2nd startup together.

TEAM Two founders, two exits · 3.5 years together · 30+ combined years building products

Yaniv Nizan

Co-Founder & CEO

- CEO & co-founder of **SOOMLA** (acquired by ironSource/Unity)
- Built **3 networks** — IntentClick (\$4M ARR ad network at Kontera), SOOMLA's payer-data network, SOOMLA's ad-creative network
- Customer in 4 referral-driven segments — startups, divorce, home-building, weddings

Matan Protter

Co-Founder & CTO

- CTO & co-founder of **Infinity** (acquired by Alibaba)
- **9 patents**
- Talpiot graduate · PhD Technion
- 3.5 years shipping products with Yaniv — SynqUp and Referna

ROUND

12-month milestone: 4,000 Weekly Active Users

~\$130M annualized economic value · ~500 weekly referrals

ASK

Pre-seed · 24 months · team of 4 (founders + 2 Talpiot grads) · 12-month seed buffer

WHY THIS IS A GREAT OPPORTUNITY

01

BNI as incumbent.

Proved the need and the market — but AI is now reaching the level where we can replace the **40,000 people** involved in their operation with something far more efficient.

02

Strong market pull.

Doubling every ~2 weeks — 174 onboarded, 117 active last week, 427 registered. **3 of 4** invitation replies are positive.

03

We love networks.

They grow fast and build a massive, compounding moat. I've built **3** already: **IntentClick** (\$4M ARR ad network at Kontera), **SOOMLA's** payer-data network, and SOOMLA's ad-creative network.
